SKILLS

Technical Skills | Javascript, React, NextJs, TypeScript, CSS, HTML, PostgreSQL, MySQL, PHP, Python, Java, C **Interpersonal Skills** | Problem Solving, Tenacious, Adaptive, Easily taught, Team Player, Sociable

PROJECTS

SHOT Café POS (Full-Stack) | React | TailwindCSS | PostgreSQL | Prisma | TypeScript

- Developed a full-stack POS system with dynamic order management and inventory tracking, implementing role-based authentication for secure access.
- Utilized TypeScript in the backend with Prisma for type safety and efficient data handling, ensuring reliable API interactions with PostgreSQL.

Clockium: Time-in/ Time-out (UI/UX, Frontend) Figma | React | TailwindCSS

- Designed a prototype and developed a time management system for tracking employee attendance and monitoring working hours, utilizing React and Tailwind CSS.
- Collaborated closely with back-end developers to ensure seamless data flow between the front-end interface and the server, optimizing the overall user experience.

Portfolio (Frontend) | NextJS | TypeScript | TailwindCSS

- Built a responsive portfolio app to showcase projects and skills, emphasizing a mobile-first design approach to ensure seamless navigation and accessibility across various devices and screen sizes.
- Focused on creating an interactive app that highlights my development work, utilizing Next.js features for optimal performance and incorporating CSS animations to enhance the overall user experience.

EXPERIENCE

Social Media Evaluator

Freelance in Appen | *February 2023 - September 2023*

- Evaluated Facebook content under Project Uolo for authenticity, conducting thorough research using reliable sources to identify fake news and misinformation.
- Analyzed the potential impact of content on public safety and opinion, estimating its reach and influence on affected audiences

Frontend Developer

Hacktiv Colab Inc. | *September 2023 - October 2023*

- Created the **Clockium** application, a time management tool designed to enhance productivity through an intuitive user interface and streamlined functionalities.
- Collaborated with cross-functional teams to refine application features, ensuring a user-friendly experience and meeting project specifications.

EDUCATION

Polytechnic University of the Philippines - Manila

Bachelor of Science in Computer Science

- GPA per semester - 1.46, 1.25, 1.69, 1.46, 1.46, 1.39, 1.50, 1.38
